

## What is the Nutrition Education Coalition?

The mission of the Nutrition Education Coalition of Northeast Georgia is to foster communication among groups and individuals interested in nutrition education and to ensure effective use of available resources.

Our goals include providing programs for the public and participating in media campaigns to promote healthy eating habits.

# Water vs. Sugary Beverages

## Seeing is Believing!

This three-panel full color laminated display is a great educational tool for anyone teaching the importance of good health.

Learn about what water does for your body—and what happens when we do not get enough.

See the caloric impact of sweetened beverages with packets showing the actual teaspoons of sugar in a variety of beverages.

Make a lasting impression and help educate about one of the leading contributors to obesity: excessive sugary beverages.

## Get Yours Today!

- Three laminated panels, one of which has eight packets containing the amount of sugar in common beverages.
- Mounted on folding black foam core display panels.
- 100 English and 50 Spanish brochures recapping information on the display.
- Powerful table top visual aids showing how sugar consumption accumulates over time.
